

5DT SecuriVUE™

AI Enhanced Video Management System

Description

The 5DT SecuriVUE™ AI Enhanced Video Management System (*US Patents Pending*), is an Artificial Intelligence (AI) enhanced system for the management of video feeds. The system performs a wide range of automated detections, identifications and trackings.

Determinations/Detections

- Firearm Detection (top-left)
- License Plate Detection (top-right)
- Loitering Detection (bottom-middle)
- Person and Object Counting (Area & Line)
- Geolocation of Persons & Objects
- Vehicle Model Recognition
- Person to Person Linking
- Demographics Detection (Age, Gender)
- Facial Recognition (top-middle)
- Unattended Object Detection (bottom-left)
- Person and Object Tracking (bottom-right)
- Access Control
- Geofencing
- Threat Detection
- Person to Location Linking

General System Features

- Real-Time or Off-Line Processing
- Multi Network Camera Standard Support
- Person Image Masking
- Multi Camera Support
- Modular AI Processor Design
- Plugins for Other Video Management Systems

Application Areas

- Airports
- Smart Cities
- Neighborhoods
- Stations
- Schools
- Hotels

Your future, our AI™

- Military Bases
- Shopping Malls
- Depots
- Buildings
- Home Security

About 5DT

5DT (Fifth Dimension Technologies) is a high tech company specializing in Machine Learning, Virtual Reality and Training Simulators for the Mining, Construction, Trucking, Aerospace and Defense Industries.

5DT has been in business for more than 25 years. It has more than 200 simulators deployed worldwide. 5DT has developed simulators for more than 140 different vehicles, machines or aircraft from more than 40 manufacturers.
